

CHAINRAILS™ Licensing & Partnerships

Resurrection-grade compliance & continuity for XRPL and beyond — licensed for sovereign and enterprise use.

Why Licensing Matters

Compliance-native rails must be governed, versioned, and auditable. Licensing ensures integrity, regulator alignment, and continuity guarantees across sovereign and enterprise deployments.

Licensing Models

- **Sovereign Licensing** — Governments, central banks, regulators.
- **Enterprise Licensing** — Banks, logistics, fintechs, stablecoin issuers.
- **Institutional Pilots** — Corridor pilots (USD–SGD, USD–AED, USD–EUR).

What's Included

- Resurrection Verification Records (RVR™) framework
- ACE (Autonomous Covenant Executor) deployment
- SDK + API access for compliance hooks
- Covenant-enforced service level guarantees

Benefits

- Regulator alignment (DORA, NIS2, RBI)
- Security & continuity assurance
- Packaged SDKs & APIs for faster adoption
- Cross-chain opportunity (beyond XRPL)

Why XRPL

- XRP as settlement fuel (liquidity + finality)
- Stablecoins: compliance-native USD/EUR/SGD settlement
- ChainRails adds compliance & continuity to XRPL rails

Positioning: Sovereign-ready. Compliance-native. Resilient.
